

Does belief-guided attention improve a trained memory?

Unseen-service DEV | All three paired seeds | Fixed continuation rule: FAIL, 13/32

Markers: seeds 6901 (circle), 6902 (square), 6903 (triangle). Lines: equal-seed means. Raw probabilities.
Full exposed development cohort; trained encoder frozen. Seen-service safeguards also enter the rule. No test-set or novelty claim.
