

RockSample: older history helps, but misses the overall continuation rule

8 constructor maps · 32 fixed exploration fragments · raw public inputs · no trained models

All 1,651 checks

42 checks with earlier reading >128 steps ago

Full history: 3.1% better than recent 128 and 8.5% better than latest check. Required: at least 10% against both.

4/6 conditions pass. No learned-memory pilot admitted. Delayed queries are only 2.54% of checks.

Gray lines: every map. Diamonds: equal-map means. Fixed exploration avoids exiting; this is not a task-return benchmark.
